

Severe Weather

Severe weather can happen anywhere and anytime, so it's important for you and your family to be prepared! Fill out this sheet and be sure to talk with your parents about what your family's plan is in case of an emergency.

__ O R __ A __

A tornado is a rotating column of air that forms a funnel shape and can be very dangerous.

If you experience one:

- Go to a basement, closet, or bathroom
- Stay away from windows
- Cover yourself with blankets
- Protect your head the best you can

T __ U N __ __ __ S __ __ R __

A thunderstorm is big storm that can create a variety of weather - including large pieces of ice (called "hail"), lightning, flooding, strong winds, or tornadoes.

If you see lightning or hear thunder:

- Get inside a building or car
- Stay away from windows, trees and water.
- If you are outside without a safe place, crouch down with only your feet on the ground. Get as low as you can.

__ L __ O __ __ G

Flooding is a lot of water that fills the area and is caused by excessive rain. Floods often come after a thunderstorm.

If you see flooding:

- Do not try to walk in the water
- Do not play in the water
- Get to a higher place than the water (up some stairs or on a deck)
- Never let your parents or grandparents drive through a flooded road
